Professional Experience

Careport Health

June '18 — Present

Associate Software Engineer

(Boston, MA)

- CarePort is a Boston-based digital health company focused on building technology solutions that enable acute and post-acute providers to work together to better manage care.
- Work on a team of 6 engineers.
- Built back end and front end features.
- Helped build a data bridge between Allscripts Care Management system and Epic's Smart on FHIR Api.
- Work on building new features along with fixing existing software bugs.
- Deploy fixes on demo, staging, and production environments.

Dentsply Sirona

July. '17 — May '18

Software Engineer

(Waltham, MA)

- A dental equipment maker and dental consumables producer that markets its products in over 120 countries.
- Lead mobile and desktop development for our Order Management System ("OMS").
- Lead the transformation of the front-end of our OMS, which was written and designed in 1994.
- Managed the life cycle of our OMS.
- Identified, analyzed, and resolved software bugs during testing and production stages.

Massachusetts State House

Jan. '16 — May '16

Graduate Student Intern

(Boston, MA)

- Created a proposal to enact Home Health Care in Massachusetts, which is estimated to save the state \$2.3 million annually.
- Developed and negotiated policies with opposing members of state senate and house representatives to decrease wait times for subsidized housing for homeless families.
- Authored proposal to reduce stress for workplace safety and improve working conditions and care for patients in nursing homes and home health care agencies.

Boston University - Wheelock College

Sep. '15 — May '16

Graduate Student Coordinator

(Boston, MA)

- Taught a group of 15 undergraduates students how to effectively converse and negotiate with state legislators and lobbyists.
- Coached students on how to advocate for the rights of vulnerable groups like the homeless, elderly, and disabled.
- Supervised student progress through the length of the program.

Projects

- **Jinn:** Designed UI/UX for this medical application, which allows physicians to enter medical orders through their smart phones. Team was selected to interview at *YCombinator*.
- **AirAlien:** This program was modeled after AirBnB, and was developed as my final project for *Coding Dojo*. Technologies used: Ruby on Rails, Bootstrap, jQuery, and Google Maps API.
- **Travello:** This app allows users to make and coordinate travel plans with friends. Technologies used: Django, Bootstrap, and Python.

Education

- **Full Stack Web Development Program**
Coding Dojo
Immersive 14-week onsite program for web development. NOV. '10 — March '11
